

Press Release Goldstream RV 20th Anniversary Editions

New look, New Furniture New Direction

Its been 20 years in the making and Goldstream RV has invested in the continued future of the company with the 20th Anniversary Edition range of models.

As one of the very few Caravan manufactures in Australia that can boast a line-up of Camper Trailers, Pop tops and Caravans we have invested in new technology which brings to the forefront of industry standards a large range of models with an edgy new look.

Storm RL 'Vacationer'

In the Camper Trailer range we have started with one of our most popular models the Storm RL 'Vacationer'. This camper based on a 14'9 body layout works extremely well in being both a family friendly layout and at the same time one of our campers that comes as a package meaning that it comes completely standard with all the main extras that our customers ask for which would normally have been an option. A long time problem with every camper ever built has been the bench heights, well this has finally been addressed in the new model by making the side walls 50mm higher increasing the working height in the kitchen and by doing this it also allows the fridge to be correctly fitted under the height of the bench. The new modular furniture look with a range of colours available has completely transformed the internal appearance of the Storm RL 'Vacationer' camper with a combination of a new floor vinyl, new deluxe upholstery and bench tops. To complete the package we have also transformed the outside appearance, gone is the traditional aluminum cladding and in is the Composite Aluminum walls. The composite walls although 1kg heavier per square meter is a small compromise for the sleek new finish which is available across all models. If the traditionalist wishes to have what we would now call the older style build we will certainly accommodate their wishes but certainly from our point of view the new is in and here to stay.

An example of the new internal finish

14' Explorer ST

14' Explorer ST Pop Top was revamped in the layout 5 years ago funnily enough by a customer who wished to swap and move things around to their own specifications and has continually changed until today. The new layout offers everything you would expect in a shower toilet caravan but with the advantages of being a low profile pop top. Now with a whole new look, new appliances and a host of extra fittings it is as close to what you would get in a full height Caravan without the size and weight.

The 14' Explorer ST makeover includes new modular furniture, modern appliances and the sleek new composite outside panel finish.

19' Rear Ensuite

To complete the range we have transformed our 19' Rear Ensuite Caravan equipped in the off road package with Vehicle Components coil independent suspension and Redarc battery management system to inside which now includes all the latest in luxury RV upholstery, the most modern and up to date kitchen appliances and a fresh new look in everything that has been done. All the electronic gizmos and gadgets are still smartly concealed behind the new look flat colored panel doors above the microwave. Something not seen before in our new Caravan range is the bedside table/wardrobe set up, again we have tried something different that truly works.

The main features of the Goldstream RV 20th Anniversary Models is the use of new materials and the different construction techniques used which are listed below.

- Composite Aluminum outside body
- New modular style furniture using 12 and 17mm light weight double sided ply veneers
- LED lighting throughout
- Deluxe upholstery
- Dometic S 7 tinted and double glazed windows
- Higher walls in the camper range
- New acoustic floor vinyl
- New look, New Furniture New Direction
